

Home Horticulture Evening Lecture Series – Student Feedback

At the Massachusetts Master Gardener Association we're all about opportunities to learn and improve our programs as well as our gardens. Home Horticulture participants are surveyed at the end of each session for feedback on the instructor's delivery and content. At the last class we also ask for feedback on the program overall. Here are a few comments from recent Home Hort students.

ABOUT OUR INSTRUCTORS:

- "The presenters were all extremely knowledgeable and had a lot to offer. Q&A was very helpful."
- "Presenters were experts in their areas."
- "Very lively, knowledgeable speakers. Never got bored."

ABOUT PROGRAM CONTENT:

- "The information was completely useful, easily understandable, and supported by solid sources."
- "Overall this program has been very beneficial. I've been gardening for 40 years, in a garden club for 10. I found the topics excellent. I knew some things about many of them but not the depth of the presentations."
- "Getting my soil tested for pH really helped me apply what I learned."

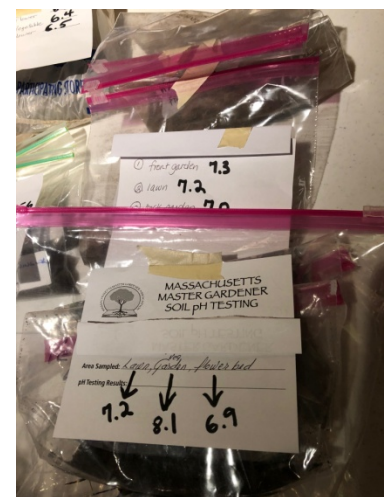

Sonja Johanson, former MMGA president, is one of our lecturers.

OTHER NICE THINGS STUDENTS HAD TO SAY:

- "Thank you for offering this at night so working and non-working people can attend."
- "Fantastic experience."
- "Friends have been asking about the program, and I have been telling them they need to take it: everyone will take away something different."
- "Class night has been the highlight of my week."
